Summary

ML engineer who owns systems end to end: data, model training, LLM agents, evaluation, and the AWS infrastructure they ship on. Works on messy, real-world data and measures every result against a baseline.

Skills

ML / AI	PyTorch, Hugging Face Transformers, PEFT/QLoRA, LangChain/LangGraph agents, RAG (ChromaDB, BM25, cross-encoder rerankers), Whisper / Wav2Vec 2.0, OpenCV, scikit-learn
MLOps / Cloud	AWS (Lambda, API Gateway, SQS, ECS Fargate, S3, DynamoDB, CloudFormation), Docker, Kubernetes, Airflow, MLflow, Jenkins, GitHub Actions
Languages / Tools	Python, SQL, Bash, Git, Linux, Streamlit, Flask, pytest

Projects

ShuttleCast: AI Tactical Analyst for Pro Badminton — *LangGraph, PyTorch, AWS* 2026

- Trained stroke-detection models (frozen DINOv2 + temporal CNN) on ShuttleSet (KDD '23) so unlabelled match video becomes analyzable: hit-detection F1 0.87 on raw broadcast of a held-out match, vs 0.37 for an audio baseline.
- Built a LangGraph ReAct agent that decides per rally whether to analyze and writes the coaching note; evals caught it blaming rally winners, and a prompt fix raised correct attribution from 62% to 94% (A/B, decisions held fixed).
- Deployed on AWS (API Gateway, Lambda, SQS, ECS Fargate, S3, DynamoDB) with video upload and live results; QLoRA-tuned a 2B vision-language model from 0% to 100% output-format compliance on a $0.20 GPU run.

FHIRFlow: Making Hospital Lab Data Queryable — *FHIR, DuckDB, LLMs* 2026

- Built a FHIR R4 to DuckDB pipeline over MIMIC-IV and Synthea with data-quality rules as SQL, which showed 0% of MIMIC's 107K lab results were queryable by LOINC: 498 hospital-local codes no standard query could find.
- Built a retrieval-grounded LLM layer mapping local lab codes to LOINC (picks only retrieved codes, else abstains): 65% exact match vs 17.5% for a rule baseline on a 40-code dev set, correctly coding 87% of those lab rows.

FinSight: Cited Q&A over SEC 10-K Filings — *RAG, ChromaDB, Ollama/Groq* 2026

- Built a RAG system over SEC EDGAR 10-K filings (AAPL, JPM, JNJ, FY2021–23) with hybrid dense + BM25 retrieval, optional cross-encoder reranking, and answers with numbered citations.
- Built a benchmarking harness comparing 9 chunking × retrieval strategies on answer similarity, context relevance and latency, with a Streamlit dashboard and CI (ruff) on every push.

Experience

Software Intern – AI/ML — *WyzMindz Solutions Pvt. Ltd. (Remote)* Jul 2022 – Dec 2022

- Implemented real-time voice activity detection to segment live audio streams for speech recognition.
- Fine-tuned Wav2Vec 2.0 models on noisy call-center audio and integrated Kaldi/Fairseq-based recognizers.
- Built a Flask real-time API combining VAD, speech-to-text and live transcription in a user-facing interface.

Education

University of Maryland, College Park May 2026
M.S. Applied Machine Learning GPA 3.73 / 4.00

Indian Institute of Technology, Dharwad 2020 – 2024
B.Tech. Electrical Engineering GPA 8.08 / 10.00

Certifications & Leadership

- DeepLearning.AI: Neural Networks and Deep Learning; Natural Language Processing Specialization.
- Academic mentor, IIT Dharwad (Aug 2022 – Aug 2023): guided 20+ undergraduates on course and career planning.
